2006 FIFA World Cup™ Visuals for Press Purposes

All visuals are available on CD-ROM for media usage in high-resolution quality. For other visuals, please submit an e-mail request (press@infrontsports.com OR press@hbs.tv) or visit www.infrontsports.com.

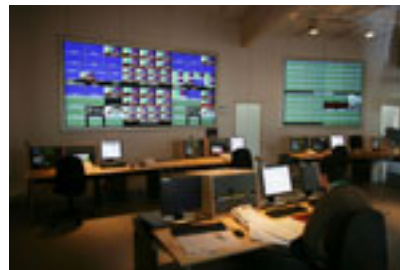

Main Entrance of the International Broadcast Centre (IBC) of the 2006 FIFA World Cup™ at the New Munich Trade Fair Centre.

Master Control Room staff at work. The team coordinates with broadcast partners and operators and oversees the distribution of signals.

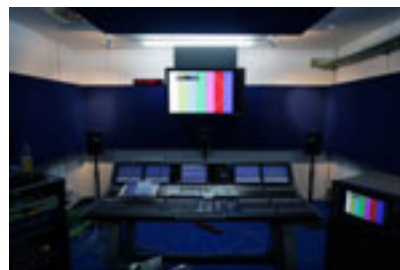

2006 FIFA World Cup™ International Broadcast Centre (IBC), Munich - Outside the HBS Master Control Room (MCR).

Incoming signals from all 2006 FIFA World Cup™ venues are monitored and distributed to Broadcast Partners from the MCR.

At the IBC Production Centre, HBS produces a broad variety high-quality audiovisual feeds.

HBS Quality Control high-end monitoring facilities for the Multi-Channel International Sound (MCIS) at the IBC Production Centre.

The IBC satellite farm under construction - HBS and T-Systems are organising satellite distribution for all 64 matches of the 2006 FIFA World Cup™.

Impressive air-conditioning in the television studio area of the IBC. HBS has installed 720 tons of air-conditioning vents for the event.
